### DETAILED ACTION

Applicant's response dated 08/11/2004 has been received and entered. Claims 1-5 and 8-24 are remain pending in the application.

#### *Terminal Disclaimer*

1. A Terminal Disclaimer has been filed; however, an attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

#### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-5 and 8-24 stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3-5 of U.S. Patent No. 6,330,049 in view of Kondo et al., US Patent No. 5,726,728.

Both patent and application disclose a liquid crystal display (LCD) device having a pair of substrates, a liquid crystal layer, wall structures defined the liquid crystal regions and about

Art Unit: 2871

one third or less of a thickness of the liquid crystal layer (see claims 3-5). The patent does not disclose each of the plurality of the regions having a shape of polygon having dulled corners as viewed from above. Kondo et al. do disclose wall structures surround and define regions having a shape of a polygon having dulled corners as viewed from above (see figures 13A-13B).

Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to modify the patent device having regions that have a shape of polygon having dulled corners as viewed from above as shown by Kondo et al. in order to improve smoothness at the region corners, so as to improve display characteristics.

The terminal disclaimer, as stated above, is not proper. Therefore, the double patenting rejection stand.

### *Conclusion*

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
